ABOUT US

Pira Charcoal Ovens manufactures professional ovens and barbecues, which satisfy the needs of the most demanding user with the highest quality.

There are more than 20,000 users of PIRA ovens and barbecues spreading the #piraflavour culture around the world.

With Pira charcoal ovens, you can grill and cook all kinds of food and give your dishes that unique barbecue flavour, all from the comfort of your kitchen.

A charcoal oven is the perfect combination of a barbecue and an oven, providing the best of both worlds in one simple machine. Our ovens and barbecues work with charcoal but small pieces of wood and/or firewood can be added.

Pira charcoal ovens use up to 40% less charcoal than traditional grills. They also allow you to cook up to 35% faster than an open barbecue.

At Pira Ovens it's all about the details... and details make the difference in product and service:

- Quality ovens at affordable prices.
- Do you need a chef? We send a chef to you wherever you are.
- PiraCold: An insulation system that drastically reduces the outside temperature and reduces charcoal consumption. We save you energy and money.
- Integrated oil and fat collector, which gives you the option to cook with grooved grills on which you can cook delicate foods (fish, vegetables) or fatty foods (chicken, duck, etc.) without fear of flames, avoiding bad smells and excess smoke and burnt food.
- The widest catalogue of grills on the market to meet any chef's needs: options of rod grills, grooved grills, skewer grills, chicken skewers, griddles, etc...
- Panoramic glass door: The chef can see the cooking chamber at all times and also the "showmanship"...
- With #piraedseries, ovens with lift-up glass doors, we reduce the space between the chef and the oven.

In this catalogue you will find our basic presentation of products, but this is only the beginning. You will no doubt have questions, concerns... Get in touch with us!

OUR OVENS

Features: Working temperature from 180 °C to 350 °C, internal firewall, ash-collection drawer, grease collection drawer (except models 50), option of half grills (except models 50, 70 and 70 XL), 180 mm smoke outlet (models 50, 70, 70 XL, 80, 80 XXL, 90 and 90 D) or 210 mm (models 120 and 120 D), thermometer, cast iron interior, PiraCold system, integrated airflow regulator.

Include: Tongs, poker, rod grill, front table (ED door only) and chimney kit (model 50 only).

3 series x 3 doors = your ideal oven

Black Series: Our introductory range. High quality painted steel and all the features you expect from a Pira Oven. Available in models 50, 70, 80 and 90.

Lux Series: Our best seller. Steel with painted finish on the front. Affordable price without compromises. Available in models 50, 70, 70 XL, 80, 90, 90D, 120 and 120D.

Silver Series: The top of the range. Fully finished in steel. A range created especially for the American market. Available in models 50, 70, 70 XL, 80, 80 XXL, 90, 90D, 120 and 120D.

AB Door: Panoramic vitro-ceramic hinged glass, allowing the interior to be seen at all times and cooking to be monitored. Available in Black and Lux series.

SD Door: Solid door without glass that allows the door to be used for plating. Available in Lux and Silver series.

ED Door: Lift-up glass door that saves space in the kitchen as it does not open forwards. Available in Lux and Silver series.

CHARCOAL OVENS
SILVER SERIES

This line is finished entirely in stainless steel and does not come with any part of the oven painted. Since its launch, the Silver Series has become the TOP LINE of charcoal ovens on the professional market.

The PIRA SILVER SERIES charcoal ovens are available with a hinged blind door and a glass lift-up door. You can find them in the most successful restaurants all over the world, and with the PIRA 50 Silver AB model you can now also enjoy having a Pira in your own home.

For lovers of #grilling and the authentic taste of #Piraflavour, the PIRA SILVER SERIES is your best option. Don't waste any more time, this is what you've always dreamed of - WELCOME!

CHARCOAL OVENS
LUX SERIES

Pira Ovens dominates the charcoal oven market with the most extensive catalogue currently available on the market and it does so with the LUX SERIES.

The PIRA LUX SERIES charcoal ovens are available with a hinged blind door, a hinged glass door and a lift-up glass door.

Since its launch, it has become the TOP SELLING LINE of charcoal ovens on the professional market. The world's best-selling generation of charcoal ovens has a name, and that is the LUX SERIES.

You can enjoy it at home with the PIRA 50 Lux AB model, at the restaurant around the corner or in dozens and dozens of Michellin Star restaurants.

#don'tacceptimitations, your business will thank you for it.

CHARCOAL OVENS BLACK SERIES

The PIRA BLACK SERIES Pira Ovens aim to appeal to all markets. The BLACK SERIES line of ovens is reduced to 3 models of black-painted, glass hinged door grill ovens, which can be used in all types and sizes of restaurants, and is designed to ensure that no restaurant is left without the unmistakable taste of "PIRAFLAVOUR".

It is the MOST AFFORDABLE LINE, but that does not mean low quality. You can enjoy it at home with the PIRA 50 Black AB model, at the restaurant around the corner or at restaurants all over the world.

WARMING TRAY

The new Pira warming trays are a great accessory for your charcoal oven and allow you to use the heat from the top of the oven, to keep your dishes warm or to allow them to cool down before cooking, while at the same time optimising the space available.

Make the most of all the space and energy in your oven with the new Pira warming trays!

CHARCOAL STORING TABLE

At Pira Charcoal Ovens, every oven has its own table. Pira tables are made with a modern design capable of supporting the heavy weights of the oven and at the same time can be easily handled by anyone. The legs of the ovens can be attached to the table, turning two pieces into one. They come with a guide for storing grills, a middle shelf and a compartment for storing charcoal.

CHIMNEY KIT

PIRA ovens are equipped with integrated firebreakers and airflow regulators, ready to operate day one by simply placing them under the hood.

If a PIRA oven is to be installed in a kitchen alongside the other elements, an exposed chimney kit must also be installed.

The regulations in most countries indicate that there must be a separate smoke outlet for smoke from solid fuels (wood or coal) and in some cases the firebreaker must be visible to the naked eye, so it is always necessary to comply with the applicable legislation. Thus, taking into account the legislation and the customer's needs, the chimney kit can be adapted to all requirements.

The chimney kit is available in two versions, the DETACHABLE chimney kit with non-detachable firebreaker and the UNIBODY chimney kit with a detachable firebreaker.

DETACHABLE CHIMNEY KIT

Kit available in 50, 70, 70 XL, 80, 80 XXL, 90 and 90 D models. You can choose with or without external regulator, always taking into account the regulations and needs. It is made up of the following components:

- Coupling ring (750.001): Part required to fit the External Firebreaker without the External Regulator.
- External Regulator (750.002): Regulates the smoke output with an external device.
- External Firebreaker (750.003): Important, never wash under water.
- Hat (750.004): Slightly decreases the temperature of the smoke, ensuring a better airflow and supplements the safety of the firebreaker.
- Adapter (750.005): Reducer for smoke and hot air outlet of the oven, from 180 mm to 150 mm.

Hat	Adapter	
Ref: 750.004 Price: 165 €	Ref: 750.005 Price: 98 €	

UNIBODY CHIMNEY KIT

Available for all PIRA OVENS. This revolutionary kit allows the user to wash it with water, without fear of obstructing the air passage in the firebreaker. The whole chimney kit comes in one piece. No external regulator can be fitted.

ROD GRILLS

Rod grill, made of stainless steel, welded, polished and designed so it's impossible for any food remains to build up on it, which allows it to be cleaned quickly and immaculately. It offers unrivalled resistance and durability.

GROOVED GRILLS

Grooved grill, made entirely of stainless steel, welded, polished and reinforced with crossbars across the width of the grill for unrivalled strength and durability.

The wave shape prevents the fire from reaching the food, making it the ideal grill for cooking delicate products such as some types of fish or vegetables. Its shape also prevents fats from falling into the embers, preventing flames, bad smells or excess of smoke, making the grooved grill the ideal tool for cooking very fatty products.

Its side arms allow it to be placed in an inclined position which is normally the position for fatty products, and in a horizontal position which is normally the position for delicate products.

The independent mobility of its arms allows the charcoal oven to be replenished in the middle of the service, without the need to remove the grill from the oven.

GRIDDLE

Another of Pira's exclusive accessories. It is very thick, and has a very attractive design capable of offering unrivalled resistance and durability in a charcoal oven.

The sloping shape allows any oils to flow into the general collector, thus preventing unpleasant odours and excess smoke.

Its side arms allow the grill to be placed in an inclined position which is normally the position for fatty products, and in a horizontal position which is normally the position for delicate products.

The independent mobility of its arms allows the charcoal oven to be replenished in the middle of the service, without the need to remove the grill from the oven.

SPLITTER

With the splitters, the customer has the option of cooking with the different types of Pira grills at the same height and at the same time, so that different types of dishes can be cooked at the same time. The splitter allows multiple configurations. The possibilities are almost endless and turn Pira grill ovens into practical multitasking ovens where the limit is set by the skill and imagination of the chef.

CHARCOAL OVENS HOME SERIES

Do you enjoy grilling? Look no further!

PIRA SERIES FOR HOME is designed for domestic use, but with all the features of a professional oven for the home.

PIRA SERIES FOR HOME are the first charcoal ovens designed for barbecue lovers who want to excel themselves.

This is referred to as an oven for the home because of its small size, but in reality they are truly professional ovens in terms of performance and quality. Many restaurants use them for space or menu reasons.

Do you want to cook like a professional chef at home?
This is the oven for you!

Features: Cast iron interior, adjustable charcoal hopper height, insulated walls and bottom, removable grills, removable grease collector, ash-collection drawer, nylon wheels, 30 minutes start-up time, working temperature from 180 °C to 350 °C.

Include: Tongs, poker, grooved grill (1 unit in M80 and 2 units in M120 and M150).

Their unique structural characteristics make these barbecues the ideal choice for users.

The charcoal hopper can be raised to facilitate the loading of charcoal during operation and also to control the intensity of the flames.

Pira barbecues adapt to any need thanks to their multiple sizes and types of grills: grooved grills, rod grills, griddles, paella grills, rotating grills for rotisseries or Argentinian restaurants, spades for rodizio, yakitori, sate...

Include: Tongs, poker, side rod grill, side grooved grill, central rod grill (150 model only) and central griddle (150 model only).

The charcoal barbecue Combi Lux is the result of several requests, suggestions and comments from all #piralovers, who needed to be even more flamboyant in the kitchen while retaining all the versatility and functionality that the BBQ SERIES barbecues have.

The side grills can be raised in order to adjust the intensity of the hot charcoal. They are equipped with a central plate warming column. It is a barbecue designed to be placed on the wall but also serves as an 'island' type.

As with all PIRA charcoal barbecues, the possibilities are endless: grooved grills, rod grills, griddle, roaster, spades for rodizio, yakitori, sate or chicken cooking.

Features: Refractory brick interior, cast iron hopper, column with 5 positions, fixed upper shelf plate warmer, removable grease drawer, ash-collecting drawer, metal feet, start-up of 30 minutes, working temperature from 180 °C to 350 °C.

Include:

Basic: Tongs, poker, skewer support.

Complet: Tongs, poker, skewer support, single skewer, double skewer, rod grill, grooved grill.

The ESP SERIES combine the best of the traditional Japanese grill with other styles of barbecues (skewers, brochettes, pintxos, rod grill, grooved, etc.).

The units are equipped with a column with multiple positions to regulate the height of the grills, facilitating the control of the grilling process. The skewer support has a longitudinal bar that can be adjusted to use different sizes of skewers, according to the customer's needs.

A support table with wheels, a shelf and a stainless steel door come with it as an accessory, which can also be used as a practical work table.

Rest. Marea. Murcia. BRA 80.

CHARCOAL

Pira selects the best charcoals from hardwoods and high calorific value. With very little spark and high performance (high density charcoals and without humidity). The calibers are large to obtain a more uniform and stable burn during service.

We offer 100% oak charcoal and 100% marabu charcoal, which are not mixed together or with other charcoals. Simply, pure charcoal. The best charcoal for the best oven.

There are many charcoals, but they are not PIRA.

- Features:
- Pure charcoals, without mixtures.
 - 15 kg bags.
 - Very high calorific value, tripling that of normal firewood. Oak charcoal between 30,000 and 33,000 kj/kg approximately. Marabu charcoal between 32,000 and 36,000 kj/kg approximately (as a reference, firewood has a calorific value of between 12,000 and 21,000 kj/kg).
 - Special granulometry for professional use (avoids having to replenish in service). Marabu charcoal has a more uniform granulometry due to the fact that it comes from a subspecies that is still in a bush state.
 - Long life: Marabu lasting up to 20% longer than oak. However, the start-up time is also longer.
 - Minimum spark and smoke reduction.
 - The charcoals with the least amount of humidity in the world. Oak charcoal between 2% and 4%. Marabu charcoal around 2%.
 - High density charcoals. Oak charcoal around 900 kg/m3. Marabu charcoal around 1000 kg/m3.
 - Ash less than 1%.

Reference	Description	Price
990.001	100% Oak charcoal	Contact us
990.002	100% Marabu charcoal	Contact us

ALUMINUM KITCHENWARE

Pira Ovens has designed and developed a specific line of cast aluminum kitchenware for charcoal ovens. These accessories are 100% handmade, using the most advanced gravity casting technique. Gravity casting ensures an ultra-resistant molecular structure of the pieces and therefore a resistance to the highest temperatures not comparable to those manufactured in series and by injection, which are exposed to deformations.

RUSTIC KITCHENWARE

Pira Ovens has designed and developed a line of 100% handmade rustic kitchenware. The only manufacturing element for this line of tableware is clay. The best clay with a high refractory quality and without ferritic elements, to ensure an unsurpassed molecular structure. The more they are used, the more they harden, being able to withstand temperatures of up to 1000 degrees without danger of breaking.

If you are looking to give the hot charcoals a more rustic and authentic image, this is the kitchenware line for you.

GRILL BASKETS

The roasting baskets are ideal for cooking and braising small foods such as shrimps, vegetables and all kinds of mushrooms. They are designed to be turned with the help of the tongs supplied with the oven. With Pira's Besugueras and Rodaballeras you will be able to roast all kinds of whole fish in your oven or barbecue without the need for tongs and safe in the knowledge that you won't break whatever it is you are cooking when you turn it over, easy to handle and without legs. Ideal for grilling fish on the grill Getaria style.
